**WE ARE YOUR PRECISE,
PROMPT MEDICAL
DELIVERY SPECIALISTS.**

You need a medical transport service you can depend on to get it right every time. At K&B Couriers, we're removing all the worry and taking full responsibility for your medical transport needs.

> WHO WE ARE

K&B Couriers is a dedicated medical courier company servicing the entire East Coast and parts of the Midwest. We believe that trust is earned by delivering on promises and the notion that if you build a team of enthusiastic people and treat them with respect they will perform at the highest industry standards. By following these guiding principles since our 1995 founding, K&B has become the courier our clients count on.

> WHAT WE DO

Put simply, we transport medical specimens and medicines for laboratories, pharmaceutical companies, pharmacies and hospitals.

Whether you are a pharmaceutical company or pharmacy, a laboratory or a hospital, you have the same pick-up and delivery needs - that your medical specimens and medicines are transported on schedule and handled properly according to their individual protocols - and K&B Couriers meets those needs 24 hours a day, seven days a week, in all weather and during all holidays.

Our couriers are specially selected and instructed to know the specific details of your account, such as your hours of operation and your pick-up and delivery schedules. They will literally know the ins and outs of your operation, as in, what door to enter and exit and when.

> HOW WE DO IT

UTILIZING STATE-OF-THE-ART TECHNOLOGIES

We utilize state-of-the-art technologies to ensure that each step in the pick-up and delivery process is monitored and verified. Our complement of over 150 drivers are each GPS tracked in real time and utilize the most up-to-date navigational aids to ensure efficient and timely deliveries. Further, the tracking technology we employ allows us - and you - to check on the status of each job through real-time client interface portals. You see what we see.

CONSTANT COMMUNICATION

By having our management team in constant communication with our driver pool, we are able to provide updates and make on-the-spot decisions to resolve issues with no waiting on your part. At the end of the job, we employ an electronic signature process so you immediately see who received your delivery and when.

TEMPERATURE CONTROLLED DELIVERY

The medical arena is always subject to temperature holding, handling and control procedures and we know that a mishandled specimen or compromised batch of medicine can be disastrous. To avoid this, we communicate all protocols to our fully HIPAA compliant couriers and our facilities house an abundant supply of dry ice and freezer packs to handle all temperature control requirements.
